Christmas tree stress toy!

Do you feel stressed about Christmas or just want to create a fun stocking filler gift? Here is a fun idea:

Sew a Christmas tree that is also a fun anti-stress tool!

You need:

- Pattern
- Wool fabric (Works with other fabrics too)
- Embroidery thread, Red and Gold
- Marble or any type of small ball

Here's how:

- Print out the template and make sure your marble, bead or ball fits. This is a bit depending on the fabric and the circumference of the marble. Test on a scrap piece.
- Cut out two pieces of wool, slightly larger than the pattern.
- For a Christmas tree look, add a few Candle Wicking stitches on a single layer of fabric as ornaments, randomly placed on the tree.
- Pin the pattern on two layers of wool and follow the lines with a straight stitch, starting at the foot of the tree.
- Make sure to add the marble before closing the foot seam.
- Cut around the tree with pinkie shears and it's done!

Happy Holidays!
