

# Christmas Tree Cone

This Christmas tree cone is a stylish and simple decoration for the holiday season. Made of fabric and heat transfer vinyl, you can make it in colors to match your table or window decor. Finished size is approximately 13" (33 cm) tall.

## What you need

- Fabric 16" x 16" (40 cm x 40 cm)
- Heavy Weight Fusible Interfacing 16" x 16" (40 cm x 40 cm)
- Heat Transfer Vinyl Gold 12" x 14" (30 cm x 36 cm)
- Fabric Grip Mat 24" x 24"
- Standard Grip Mat 12" x 24"
- Rotary Blade
- Basic Blade
- Brayer
- Weeding Tool

- Sewing Machine
- Thread
- Heat Press
- Parchment Paper
- Hook and Loop tape ½" wide 10" (25 cm)

## Directions

1. Apply the heavy weight fusible interfacing onto the wrong side of the fabric, following the manufacturer's instructions.

2. Open the project in Canvas. Go to the Output Menu and press Send to Machine. Place the fabric with interfacing on the Fabric Grip Mat. Use a Brayer to help adhere the material to the cutting mat. With the rotary blade in the right carriage, follow the steps to cut the material on your crafting machine.

*Note: When using more than one material, check all settings and customize inputs for your mat size, material type, material size, and arrangement of pieces before selecting next to begin cutting each layer.*

3. Place the heat transfer vinyl on the Standard Grip Mat. Change to the basic blade and follow the steps to cut vinyl on your crafting machine. Weed the vinyl and set aside for now.
4. Set your sewing machine for a narrow zigzag and sew all the way around the shape.

5. Position the heat transfer vinyl on your tree. Cover with a piece of parchment paper and use the Heat Press to apply.

6. Sew the hook and loop tape; sew the hook side to the wrong side of the tree at the straight edge. Sew the loop side on the right side of the tree as shown below.

7. Close the hook and loop tape and the tree is done.
