

Leather Bracelet

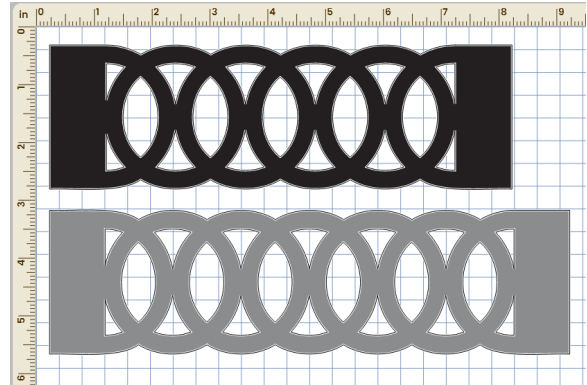

Simple, intersecting circles make up the design of this leather cuff. Because it's made from soft leather or faux leather, it is comfortable to wear. Add a snap closure to finish! There are two sizes included in the file: 2½" x 8" (6.4cm x 20.3cm) and 2½" x 9" (6.4cm x 23cm).

What you need

- Faux Leather
- Strong Grip Mat 12" x 12"
- Rotary Blade
- Painter's Tape
- Snap Fastener
- Pliers or Hammer (to apply snap fastener)

Directions

1. Open the project in Canvas. For the smaller size bracelet, select the black layer. For larger size, select the gray layer.

2. Place the material, face up on your Strong Grip Mat. Use a Brayer to help adhere the material to the cutting mat, eliminating wrinkles or bubbles. Tape all four sides of the material down to the mat using painter's tape.
3. Go to the Output menu and press Send to Machine. Follow the steps to cut the material on your crafting machine.

Note: If using another similar material, perform a test cut to determine the specific blade, speed and pressure for your material.

4. Mark on each side where you want to apply the snap fastener. Use pliers or a hammer to apply.
