

Cookie Monster Cupcake Topper

Birthday parties are often celebrated with cupcakes, and these fun cupcake toppers are sure to make everyone at the party smile! The project includes the numbers from 0-9, so that the toppers are customizable as needed for your event. The finished size of the cake topper is approximately 2" x 2" (5cm x 5cm).

What you need

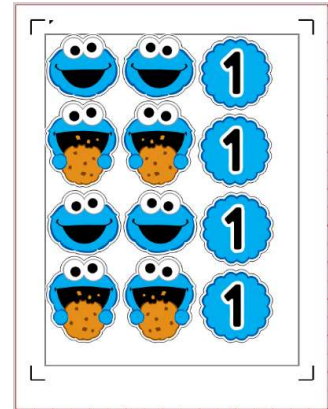

- Medium Cardstock Printer paper (White)
- Printer
- Light Grip Mat 12" x 12"
- Basic Blade
- Bamboo Skewers Flat 6" (20cm) long
- Adhesive

Directions

1. Open the project in Canvas. Set the size of the canvas to match the size of your printer paper (Letter or A4).
2. Select the numbers you do NOT want and delete them. You will need two shapes for each cake topper, front and back. Duplicate and arrange the shapes to fit on your canvas, leaving 1 inch (2,5cm) margin around the edges as the printable area is smaller than the canvas.

3. Go to the Output Menu and press Send to Machine. Follow the steps to Print the page in your printer.
4. Place the printed paper on your Light Grip Mat. Follow the steps to cut the around the designs on your crafting machine.

5. Glue the shapes to the bamboo skewers, front and back. For the monsters, make sure you put them together in pairs that are mirror imaged.
